DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Liao (6589069).

In regard to claim 1, Liao discloses an electrical extension lead, comprising an electrical cable 14 having a first end (not marked) and a second end (not marked), having the first end connected to a plug socket arrangement 13 for supplying electricity to electrical devices 50, and with the second end connected to an electrical plug 22 for connection to electrical supply sources (see Col.3, lines 10-13), characterised in that a battery pack charging assembly 70 is also connected (electrically) to the first end of the cable, which charging assembly 70 is suitable for charging battery packs for powering electrical devices.

In regard to claim 2, Liao discloses the plug socket arrangement 13 and the battery pack charging assembly 70 are co-located.

Claims 1 – 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Krieger (5982138).

In regard to claim 1, Krieger discloses an electrical extension lead, comprising:

an electrical cable 36,34 having a first end (not marked, area 34) and a second end (not marked, area 36), having the first end connected to a plug socket arrangement 56 for supplying electricity to electrical devices kk, and with the second end connected to an electrical plug 36 for connection to electrical supply sources (see Col.4, lines 56-59), characterised in that a battery pack charging assembly (not shown, see Col.3, lines 34-36) is also connected (electrically) to the first end of the cable, which charging assembly bb is suitable for charging battery packs for powering electrical devices.

In regard to claim 2, the plug socket arrangement and the battery pack charging assembly are co-located.

In regard to claim 3, Krieger discloses the plug socket arrangement 56 and the battery pack charging assembly (not shown, see Col.3, lines 34-36) are mounted within a common housing arrangement.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Liao (6589069).

In regard to claim 17, Liao discloses most of the claim invention except the electrical supply source is a mains supply source or a fuel powered generator supply source,

Art Unit: 2833

it has been held that a recitation with respect to the manner or method in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. See Ex parte Wikdahl, 10 USPQ2d 1546, 1548 (Bd. Pat. App. & Inter. 1989); Ex parte Masham, 2 USPQ2d 1647, 1648 (Bd. Pat. App. & Inter. 1987); In re Casey, 370 F.2d 576, 152 USPQ 235, 238 (CCPA 1967); see also M.P.E.P. § 2111.02. A process or environment of use limitation in an apparatus claim will not patentably distinguish the claim from the prior art unless it somehow imposes a structural limitation.

"Intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art." M.P.E.P. § 2111.02 (citing In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963)).

Allowable Subject Matter

Claims 4 - 6 and 7 - 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In regard to claims 4 and 7, The Prior Art of record does not teach or suggest an electrical extension cable assembly with a battery connected to the cable end at the side, where an electrical device connected, the assembly comprises a storage structure and the cable is stored by wrapping it around the storage structure.

Art Unit: 2833

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Martensson (5923147), Schwartz (4893037), Branderburg (4079304), Hill (4466581), Smith (6346006), Usui et al. (5720628), Major (6452108), Wang et al. (6127803), Bean (US 2002,0106934).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Larisa Z Tsukerman whose telephone number is (571)-272-2015. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A Bradley can be reached on (571)-272-2800 ex. 33. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
